

Herb Books Recommended

Website: [Healthy Christian Living - Living by the Blueprint](#)

1. The Natural Remedies Encyclopedia, 7th Edition. The herb information is correct and has pretty detailed info.

2. Back to Eden by Jethro Kloss

3. Encyclopedia of Medicinal Plants is really good. It's the same author who wrote 'Encyclopedia of Foods and their Healing Power'.

If they want to order for a good price, send them my way because I still sell them.
